Guidance for 2019

The Group revenue of continuing operations for 2019 is estimated to be in the range of +6% and +2% compared to the 2018 combined revenue of continuing operations (pro forma, restated 2018: EUR 3,201.0 million). Previously the company estimated the revenue in 2019 to be in the range of +5% and -3% compared to 2018.

In 2019, the adjusted operating profit¹ of continuing operations is estimated to be EUR 160–185 million (pro forma, restated 2018: EUR 132.0 million). Previously the company estimated the adjusted operating profit of continuing operations in 2019 to be EUR 160–200 million.

GUIDANCE RATIONALE

- The result guidance for 2019 is based, for instance, on the estimated time of completion of residential projects under construction and the company's solid order backlog. At the end of September, 78% of the order backlog was sold.
- Significant fluctuation is expected to take place between the quarters due to normal seasonal variation, closing of sales of business premises projects, the timing of completion of residential projects and the fair valuation of Mall of Tripla. As in 2018, the last quarter of the year is expected to be clearly the strongest.
- The company estimates that the adjusted operating profit for the fourth quarter of 2019 will increase from the comparison period (pro forma, restated EUR 99.3 million).

¹ Adjusted operating profit reflects the result of ordinary course of business and does not include material reorganisation costs, impairment charges or other items affecting comparability. Adjusted operating profit is disclosed to improve comparability between reporting periods. Adjusting items are defined more precisely in the tables section of the interim report.
